

TECHNICAL ASSESSMENT

Coding Project Assignment

PROJECT DETAILS

Project: Modern Frontend Application - Full Stack MERN and Mobile Developer

Position: Full Stack MERN and Mobile Developer

Company: Our Company

Level: Mid-level

Duration: 8-12 hours

Technologies: React.js, Node.js, MongoDB

Industry: Technology

WHAT TO BUILD

As part of the Full Stack MERN and Mobile Developer role at Our Company, you'll be working on a project that aligns with our Technology industry focus. Build a comprehensive application that demonstrates your skills in React.js, Node.js, MongoDB. This project will evaluate your practical development abilities and how you approach real-world challenges in the Technology industry. This project will help us evaluate your practical skills and how you approach real-world development challenges. This project will test your ability to work with modern web technologies and frameworks.

REQUIREMENTS

1. Create a responsive single-page application with modern UI/UX
2. Implement component-based architecture with reusable components
3. Add state management for complex data handling
4. Integrate with external APIs and handle loading/error states
5. Implement routing and navigation between different views
6. Add form validation and user input handling
7. Create responsive design that works on all device sizes
8. Implement data visualization or interactive features
9. Add unit tests for components and utilities
10. Optimize performance with lazy loading and code splitting

WHAT TO SUBMIT

1. Complete frontend application with modern framework
2. Responsive UI with excellent user experience
3. Component library with reusable elements
4. Comprehensive testing suite with good coverage
5. Performance optimization and accessibility compliance
6. GitHub repository with detailed README
7. Live demo deployed on cloud platform
8. Code documentation and setup instructions

HOW YOU WILL BE EVALUATED

1. Code Quality & Architecture (30%): Clean, maintainable code with proper structure
2. Functionality & Completeness (25%): All requirements implemented and working
3. Testing & Documentation (20%): Comprehensive tests and clear documentation
4. Performance & Optimization (15%): Efficient algorithms and optimized code
5. Best Practices & Standards (10%): Following industry conventions and patterns

SUBMISSION STEPS

1. Create a GitHub repository with your solution
2. Write a README.md with setup instructions
3. Add unit tests with good coverage
4. Deploy your app to a cloud platform
5. Email us your GitHub link and demo URL
6. Include screenshots or demo video

RECOMMENDED FOLDER STRUCTURE

```
project-name/  
% % %  README.md  
% % %  package.json  
% % %  src/  
%      % % %  components/  
%      % % %  services/  
%      % % %  index.js  
% % %  tests/  
% % %  docs/
```

TIPS

- Read all requirements before starting
- Plan your approach first
- Write clean, commented code
- Test your solution thoroughly
- Document your decisions
- Make sure it runs without errors

DEADLINE

Submit within 8-12 hours of receiving this assignment.
