

TECHNICAL ASSESSMENT

Coding Project Assignment

PROJECT DETAILS

Project: Java Enterprise Application - Full Stack Java Developer

Position: Full Stack Java Developer

Company: Our Company

Level: Mid-level

Duration: 8-12 hours

Technologies: Java, HTML, CSS, JavaScript

Industry: Technology

WHAT TO BUILD

As part of the Full Stack Java Developer role at Our Company, you'll be working on a project that aligns with our Technology industry focus. Build a comprehensive application that demonstrates your skills in Java, HTML, CSS, JavaScript. This project will evaluate your practical development abilities and how you approach real-world challenges in the Technology industry. This project will help us evaluate your practical skills and how you approach real-world development challenges. This project will test your ability to work with modern web technologies and frameworks.

REQUIREMENTS

1. Build enterprise application using Spring Boot
2. Implement microservices architecture with proper communication
3. Add database integration with JPA/Hibernate
4. Implement security with Spring Security
5. Create RESTful APIs with proper error handling
6. Add configuration management and profiles
7. Implement logging and monitoring with Actuator
8. Write unit tests with JUnit and Mockito
9. Add API documentation with Swagger
10. Implement caching and performance optimization

WHAT TO SUBMIT

1. Complete Spring Boot application
2. Microservices architecture with proper separation
3. Database integration and migration scripts
4. Comprehensive test suite with good coverage
5. API documentation and Postman collection
6. Docker containerization and deployment
7. Performance testing and monitoring setup
8. GitHub repository with detailed documentation

HOW YOU WILL BE EVALUATED

1. Code Quality & Architecture (30%): Clean, maintainable code with proper structure
2. Functionality & Completeness (25%): All requirements implemented and working
3. Testing & Documentation (20%): Comprehensive tests and clear documentation
4. Performance & Optimization (15%): Efficient algorithms and optimized code
5. Best Practices & Standards (10%): Following industry conventions and patterns

SUBMISSION STEPS

1. Create a GitHub repository with your solution
2. Write a README.md with setup instructions
3. Add unit tests with good coverage
4. Deploy your app to a cloud platform
5. Email us your GitHub link and demo URL
6. Include screenshots or demo video

RECOMMENDED FOLDER STRUCTURE

```
project-name/  
% % % README.md  
% % % package.json  
% % % src/  
%   % % % components/  
%   % % % services/  
%   % % % index.js  
% % % tests/  
% % % docs/
```

TIPS

- Read all requirements before starting
- Plan your approach first
- Write clean, commented code
- Test your solution thoroughly
- Document your decisions
- Make sure it runs without errors

DEADLINE

Submit within 8-12 hours of receiving this assignment.
