

TECHNICAL ASSESSMENT

Coding Project Assignment

PROJECT DETAILS

Project: Full-Stack Application - Full stack python

Position: Full stack python

Company: Our Company

Level: All levels

Duration: 8-12 hours

Technologies: Technical Skills, Problem Solving, Analytical Thinking

Industry: Technology

WHAT TO BUILD

As part of the Full stack python role at Our Company, you'll be working on a project that aligns with our Technology industry focus. Build a comprehensive application that demonstrates your skills in Technical Skills, Problem Solving, Analytical Thinking. This project will evaluate your practical development abilities and how you approach real-world challenges in the Technology industry. This project will help us evaluate your practical skills and how you approach real-world development challenges. This project will test your ability to work with modern web technologies and frameworks.

REQUIREMENTS

1. Build a complete full-stack application
2. Implement both frontend and backend components
3. Add database integration and data persistence
4. Implement user authentication and authorization
5. Create responsive user interface
6. Add API endpoints for data communication
7. Implement error handling and validation
8. Write tests for both frontend and backend
9. Add deployment configuration
10. Implement security best practices

WHAT TO SUBMIT

1. Complete full-stack application
2. Frontend with modern UI/UX
3. Backend API with proper endpoints
4. Database schema and data models
5. Comprehensive testing suite
6. Deployment configuration and scripts
7. Documentation and setup instructions
8. Live demo with all features working

HOW YOU WILL BE EVALUATED

1. Code Quality & Architecture (30%): Clean, maintainable code with proper structure
2. Functionality & Completeness (25%): All requirements implemented and working
3. Testing & Documentation (20%): Comprehensive tests and clear documentation
4. Performance & Optimization (15%): Efficient algorithms and optimized code
5. Best Practices & Standards (10%): Following industry conventions and patterns

SUBMISSION STEPS

1. Create a GitHub repository with your solution
2. Write a README.md with setup instructions
3. Add unit tests with good coverage
4. Deploy your app to a cloud platform
5. Email us your GitHub link and demo URL
6. Include screenshots or demo video

RECOMMENDED FOLDER STRUCTURE

```
project-name/  
% % % README.md  
% % % package.json  
% % % src/  
%   % % % components/  
%   % % % services/  
%   % % % index.js  
% % % tests/  
% % % docs/
```

TIPS

- Read all requirements before starting
- Plan your approach first
- Write clean, commented code
- Test your solution thoroughly
- Document your decisions
- Make sure it runs without errors

DEADLINE

Submit within 8-12 hours of receiving this assignment.
